EXPERIENCE

NimbleRx

A technology company that enables pharmacies across the country to streamline their interactions with patients.

Senior UX Researcher December 2022 - Present

- Increased patient app adoption by 10% through user discovery, usability assessment, and A/B testing on a direct-to-consumer mobile product.
- Increased fill volume by 30% and onboarded 20+ new pharmacies by identifying pain points through qualitative research including interviews, contextual inquiry, and concept testing.
- Led workshops with cross-functional leadership to map service design for new pharmacy verticals, directly influencing product strategy and roadmap.
- Coach and mentor pharmacy project team to build and triage issues to improve pharmacy workflow.

UX Researcher February 2021 - December 2022

- Founding researcher across all product verticals, establishing research practice, processes, and tooling from scratch in an early-stage environment.
- Improved NPS by 15+ points through improved data collection, tracking, and analysis sharing with leadership.
- Built a research repository to improve visibility and drive research adoption across the organization.

Telenav

An AI-powered navigation, infotainment, and in-car commerce solutions provider for automotive OEMs.

UX Researcher July 2019 - September 2020

- Led generative and evaluative research for in-car commerce and infotainment products across mobile, voice, and Human-Machine Interface (HMI) platforms.
- Conducted usability and compliance testing for HMI interfaces to meet European automotive safety standards, including MirrorLink certification requirements.
- Improved usability and NPS through iterative testing for OEM infotainment, achieving System Usability Scale (SUS) above 80 and NPS above 30.

UX Researcher Intern June 2018 - September 2018

- Conducted drive-along usability tests for mobile navigation to improve onboarding and first-user experience for a major OEM client.
- Launched a beta program to gather continuous user feedback for bug tracking and product improvements.

Washington MESA

A program supporting underrepresented students in math, engineering, and science achievement.

Research Assistant April 2014 - June 2017

- Worked on research that focused on retention rates in engineering education of underrepresented demographics at the college level.
- Assisted in content and curriculum development for project-based learning in STEM for K-12 students.
- Assisted in planning and execution of professional developments for Pacific Northwest MESA teachers.

RESEARCH SKILLS

User interviews

Usability testing

Diary studies

Contextual inquiry

Ethnographic studies

Survey design

Concept testing

Focus groups

Prototyping

Design thinking workshops

UX copywriting

Written communication

EDUCATION

Human-Centered Design & Engineering

University of Washington

2019

Master of Science (M.S.)
